Allowable Subject Matter

1. Claims 2-4, 6-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's arguments are persuasive. With respect to claims 8-12, further examination of the Seo patent reveals that Seo modifies the requantization scale based on a fixed ratio between the input bitrate R1 and the transcoded bitrate R2 irregardless of the macroblock properties. The level of importance of each macroblock and determining a requantization scale based of the level of importance as claimed are not disclosed. Hence, the rejection of claims 8-12 under 102(e) in view of Seo is hereby withdrawn. Newly added claim 15 is dependent on now allowable dependent claim 10. With respect to claims 2-4 and 6-7, further examination of the Satoh patent reveals that Satoh decodes DC-difference component. Requantization is disclosed in Satoh, but it fails to disclose determining a requantization scale that corresponds to the DC-component difference value as claimed. Hence, the rejection of claims 2-4 and 6-7 under 102(e) in view of Satoh is hereby withdrawn. Claims 13-14 are newly added which depend on now allowable dependent claim 3. Further search fails to yield reasonable prior art that teach or suggest the limitations discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1 and 5 have been canceled.
